

# Guest Module 1

## Remote Keypad

### Product Overview

Guest Module 1 gives you remote access to the on-hook / off-hook and dial features of JK Audio digital hybrids such as the Innkeeper 1, 1x, 1r, 1rx and Broadcast Host.

This little time-saver gives you call control you simply can't get with an auxiliary telephone and a couple of switches. Connect Guest Module 1 to your JK Audio digital hybrid using an 8 pin RJ45 modular cable. This cable provides remote power so there is no need for batteries or an external power pack. The Call button will flicker when a call comes in. Press this button to answer or place a call. The button will stay lit when a call is present. When you dial on-air, the tones go out on the line, and do not come back mixed with the dial tone or caller signal.

Guest Module 1 was designed exclusively for use with JK Audio Digital Hybrids.
